Contact:	+357 2225 0435 info@connectfinancials.com
Website:	www.connectfinancials.com

1. Purpose of This Disclosure

This Risk Disclosure Statement is issued by Connect Financials LLC, a licensed financial services provider registered in the Comoros Union (License No. T2023300, Company Registration No. HY00523008). It informs clients of the potential risks associated with trading leveraged financial instruments, including Forex, CFDs, commodities, indices, and other derivatives. Trading these instruments carries a high level of risk and may not be suitable for all investors.

2. General Risk Warning

Trading leveraged products involves a significant risk of loss. Prices may move rapidly against you, resulting in losses greater than your initial investment. Leverage amplifies both gains and losses. You should not trade with money you cannot afford to lose. The value of investments can fluctuate sharply, and past performance is not a reliable indicator of future results.

3. Nature of Leverage and Margin Trading

Leverage allows you to open larger positions than your initial margin. While this increases potential profits, it equally increases losses. If the market moves unfavorably, you may lose more than your deposited funds. You may be required to deposit additional margin. Failure to maintain sufficient margin can result in automatic liquidation of positions at a loss.

4. Market Volatility and Liquidity Risk

Prices in global financial markets can be influenced by economic data, political events, and unexpected global developments. Such conditions may cause volatility, price gaps, and low liquidity. Stop-loss orders may not always be executed at intended levels, resulting in larger-than-expected losses.

5. Technical and System Risks

Trading online involves reliance on internet connectivity, platforms, and data feeds. Failures, delays, or disruptions can affect order transmission or execution. Connect Financials LLC is not responsible for losses resulting from platform downtime, server issues, or third-party data interruptions.

6. Execution Risk and Slippage

During volatile or illiquid market conditions, execution prices may differ from quoted prices (slippage). Orders may be filled at a worse or better rate than requested. Prices displayed on trading platforms are indicative and may vary from execution prices due to latency or provider variations.

7. Currency, Interest Rate, and Political Risks

Foreign exchange trading exposes clients to currency fluctuations. Central bank policies, interest rate changes, or political instability can lead to sudden and significant market movements, increasing exposure to loss.

8. Counterparty and Jurisdictional Risks

Your relationship with Connect Financials LLC is governed by the laws of the Comoros Union. Regulatory protections may differ from those in your home country. In rare circumstances, counterparty or systemic risks could affect your funds or open positions.

9. No Guarantee of Profit

Trading leveraged products is speculative and should not be considered a guaranteed source of profit. Educational content or analysis provided by Connect Financials LLC does not constitute investment advice. The client alone is responsible for trading decisions and outcomes.

10. Risk Management Guidelines

To manage trading risks, clients are advised to: use stop-loss orders, start with demo accounts, limit leverage, diversify investments, and monitor open positions regularly. Proper risk management can reduce but not eliminate exposure.

11. Client Acknowledgment

By opening an account and trading with Connect Financials LLC, you acknowledge understanding and acceptance of the risks disclosed herein and confirm that you are financially capable of bearing potential losses.
